Mumbai, Feb 11 (IANS) The Indian stock market crashed on Tuesday, with the Sensex and Nifty falling over 1.3 per cent in the afternoon trade, as US President Donald Trump formally announced plans to impose 25 per cent tariffs on all steel and aluminium imports. In the afternoon trade, the Sensex tumbled nearly 1,000 points, or 1.25 per cent, to around 76,300, while the Nifty slipped 300 points, or 1.3 per cent, falling below the 23,100 mark. The broader market suffered even more, with midcap and smallcap indices plunging as much as 3.5 per cent amid deeper concerns beyond blue-chip stocks. The ongoing market decline comes after former US President Donald Trump signed executive orders on February 10 to expand tariffs on steel and aluminium imports from March 12.

## India, France stress on synergy at AI Roundtable on sidelines of summit

Paris, Feb 11 (IANS) The second India-France AI Policy Roundtable held on the sidelines of AI Action Summit 2025 stressed the potential for India and France to synergise on various policy positions and technological initiatives, fostering benefits not only at the bilateral level but also on a global scale by leveraging complementary knowledge and skill sets.

The roundtable discussion started with opening remarks by India's Principal Scientific Adviser (PSA) Ajay Kumar Sood where he highlighted India's priorities in global AI policy and governance, including responsible AI development and deployment, equitable benefit sharing, adoption of a techno-legal framework for AI governance, interoperable data flows, and collaboration on AI safety, research, and innovation.

Secretary, Cyber Diplomacy Division, Ministry of External Affairs and Henri Verdier, Ambassador for Digital Affairs, French Ministry for Europe and Foreign Affairs gave co-chairs remarks highlighting DPI for AI, global AI governance, AI foundation models and priority areas, such as integrating AI in addressing global challenges. They also mentioned cross-border data flows lacking arbitration mechanisms and the importance of aligned views

on data sovereignty. Speakers at the roundtable emphasised the need for democratised access to AI resources, and capacity building while recognising the importance of techno-legal frameworks. The participants highlighted the significance of sovereign AI models, ethical AI deployment and the need to define globally accepted terminologies and standards. They also aligned on multilingual LLMs, federated AI compute infrastructure, and interoperable access to AI research, datasets, and high-performance computing resources.

## Kohlu machine becomes centre of attraction at Maha Kumbh

Prayagraj, Feb 11 (IANS) Amidst the spiritual fervor of the Maha Kumbh, where millions of devotees gather to take a holy dip at the confluence of the Ganges, Yamuna, and the mythical Saraswati rivers, one unique attraction is quietly stealing the spotlight. In the heart of the Khadi Utsav pandal, a 'Kohlu machine' is drawing crowds with its traditional method of extracting pure, cold-pressed oil. This centuries-old process has captivated both health-conscious visitors and those keen on preserving ancient Indian practices.

The Kohlu machine, an age-old oil extraction method, is fascinating attendees with its natural technique, which involves extracting oil at a low temperature, preserving its nutritional value. The process is powered by wood and works without the high-speed machinery and intense heat associated with modern oil production methods. Visitors are not only witnessing a traditional craft in action but also learning about its health benefits. Talking to IANS, Vipin Kumar, a devotee said, "It's truly special to see oil being extracted this way. The natural process is incredibly beneficial for health. By coming here in the Ganga Sabha Triveni, we are not just connecting with the divine, but also gaining knowledge on how to stay healthy naturally and keep diseases at bay. The oil produced here is of excellent quality, and I had the chance to test it myself. "The traditional Kohlu machine works at a much lower temperature—around 30 to 35 degrees Celsius—compared to modern machines that run at temperatures of up to 100 degrees. This low-temperature extraction ensures that the oil retains its full nutritional value, unlike refined oils processed under high heat, which lose many of their vital nutrients. Chetan Rajput, a passionate advocate for

per minute, destroying the nutritional content. When we process foods in their natural way, we retain the goodness that nature intended. "Rajput further elaborated on the importance of natural processing, drawing a comparison to the production of sugar and jaggery. "Sugar and liquor are made from sugarcane, but what makes them harmful is the intense, artificial processing—high temperatures and chemical additives. On the other hand, natural processing, as seen with the Kohlu machine, is much healthier, retaining the essence of the seeds or fruits being used," he concluded. --IANS/jk/dan
